Miami Dade College aims to boost Latinx student success system-wide thanks to $14 million in federal grants meant to improve outcomes at Hispanic-serving institutions of higher ed.

Five of the college’s campuses received Title V grants, ranging from $2.5 million to $3 million each.

The funds will bolster STEM and health sciences programs with new models of instructional delivery, advising, professional development, and dual-credit programs for high school students, says Lenore Rodicio, Miami Dade College’s executive vice president and provost.

A key focus of the many of the student success programs will be helping high school graduates transition to higher education, Rodicio says.
